P R O F I L E

Full-Stack Developer with 4+ years of commercial experience building scalable web applications using React, Next.js, TypeScript, Node.js, and NestJS.

Delivered large-scale educational platforms, multi-market B2B solutions, serverless AWS applications, CMS migrations, and mobile applications. Experienced in designing and building GraphQL and REST APIs, working with SQL and NoSQL databases, and integrating AWS services.

E D U C A T I O N

● BACHELOR'S DEGREE

NURE "Kharkiv National University of Radioelectronics"
2016–2020

● MASTER'S DEGREE

NURE "Kharkiv National University of Radioelectronics"
2020–2021

S K I L L S

- **React**, Next.js, **TypeScript**, JavaScript (ES6+)
- **Node.js**, **NestJS**, Express, tRPC
- REST, GraphQL, Apollo Client, Apollo Server, CQRS, DataLoader
- JWT, PassportJS
- **PostgreSQL**, **MongoDB**, MySQL
- **AWS**: Lambda, Cognito, S3, SQS
- Docker, Docker Compose, CI/CD
- **Testing**: Jest, React Testing Library, Playwright, Cypress, Vitest
- **AI-assisted development**: Claude Code, Cursor, GitHub Copilot, ChatGPT, spec-driven development
- Prisma, Drizzle ORM, MikroORM, Mongoose, Sequelize, TypeORM
- WebSocket, WebStorage, WebWorkers
- Postman, Insomnia, Swagger, OpenAPI
- Algorithms and data structures
- Redux Toolkit, Zustand, RTK Query, TanStack Query
- React Hook Form, Zod, React Select
- React Native, React Native Paper
- Tailwind CSS, Material UI, Styled Components, SCSS, Storybook, Figma
- Agile, Scrum, Kanban, Pair Programming
- Test-Driven, Feature-Driven, Behavior-Driven Development
- Git, GitHub, Bitbucket, GitLab
- Jira, Asana, Trello
- Webpack, Babel, ESLint, Prettier, Biome, Husky
- Redux, Redux Saga, Redux Thunk, Reselect
- SAP integrations, GetStream.io
- PHP, Symfony
- **Systems**: macOS, SUSE Linux, Microsoft Windows

E X P E R I E N C E

● Langivi Technologies

From 01.2021 to 03.2022

- Integrated React frontend features with backend services built in PHP and Symfony, following MVC architecture principles
- Maintained and extended a legacy React application built with class components, refactoring existing code to improve application stability
- Implemented new features against functional and business requirements, collaborating with the team on product improvements
- Optimized landing pages and UI layouts

LIVE DEPLOY: [VISIT SITE](#)

Comfortable using AI-assisted development tools, including Claude Code, Cursor, GitHub Copilot, and ChatGPT, as part of day-to-day development and spec-driven workflows. Take ownership of features from requirements to production, covering them with unit, integration, and end-to-end tests while collaborating directly with stakeholders, clients, and distributed teams.

(React, TypeScript, Styled Components, PHP, Symfony, PostgreSQL)

● SoftServe

From 10.2023 to 03.2026

- Education Platform (NDA)

- Worked as a Full-Stack Developer on a large-scale educational platform
- Built REST APIs and application business logic with Node.js, Express, and MongoDB
- Developed responsive frontend features with React and TypeScript using a component-based architecture
- Managed application state with Redux Toolkit and built documented, reusable UI components in Storybook
- Wrote end-to-end and component tests with Cypress, React Testing Library, and Vitest

(React, TypeScript, Redux Toolkit, Storybook, Material UI, Node.js, Express, MongoDB, Cypress, React Testing Library, Vitest)

- Mobile Application (NDA)

- Developed a mobile application with React Native (Expo) as part of the platform ecosystem
- Implemented UI components and core application functionality with TypeScript and React Native Paper
- Integrated mobile features with backend services

(React Native, React Native Paper, TypeScript, Testing)

- Headless CMS Platform (NDA)

- Migrated content and data between headless CMS platforms (Contentful to Payload CMS), maintaining data integrity and consistency across environments
- Developed frontend functionality with Next.js, React, and TypeScript, integrating CMS-driven content into the application
- Implemented GraphQL queries and APIs to fetch and manage structured content
- Wrote unit and component tests with React Testing Library and Jest
- Improved content workflows with the team to support scalable content delivery

(Next.js, React, TypeScript, Contentful, Payload CMS, GraphQL, React Testing Library, Jest)

- B2B E-commerce Platform (NDA)

- Built frontend features for a multi-market B2B e-commerce platform using Next.js (App Router) with server-side rendering (SSR) and TypeScript
- Implemented market-specific functionality and business logic based on regional requirements
- Delivered responsive and scalable user interfaces with consistent behavior across markets
- Collaborated with backend teams on Java services and SAP integrations
- Wrote and maintained automated tests and took part in code reviews

(Next.js, TypeScript, Styled Components, Java, SAP, Testing)

● Geniusee

From 03.2026 to now

- Lingvist (NDA)

- Contributed as a Full-Stack Developer to the development of a large-scale educational platform
- Developed responsive frontend features using Next.js, React, and TypeScript, leveraging component-based architecture and modern UI libraries
- Implemented backend functionality using NestJS and GraphQL, building scalable APIs and supporting application business logic
- Integrated GraphQL, Apollo Client, and modern state-management solutions to build fast and interactive user experiences
- Built reusable UI components and maintained a responsive design system using Tailwind CSS and component-driven development practices
- Ensured application quality by writing unit, integration, and end-to-end tests and participating in code reviews and CI/CD processes
- Collaborated within an agile team to deliver features, participate in sprint demos, and support continuous product improvements

(Next.js, React, TypeScript, NestJS, GraphQL, Apollo Client, Tailwind CSS, React Hook Form, Zod, Jest, Playwright, Biome)

- MaisonVin (NDA)

- Contributed as a Full-Stack Developer to the development of a large-scale social platform for wine collectors and enthusiasts
- Developed a serverless backend using NestJS, GraphQL, and MikroORM, building scalable APIs and business logic on AWS Lambda and PostgreSQL
- Designed and implemented GraphQL resolvers, database queries, and business logic for authentication, events, and notifications
- Built responsive frontend features using Next.js, React, and TypeScript, leveraging component-based architecture and modern UI libraries
- Implemented core functionality, including authentication, wine collections, event management, real-time feeds, notifications, and image uploads
- Integrated AWS services such as Cognito, S3, and SQS, ensuring secure authentication, file storage, and asynchronous processing
- Applied CQRS, DataLoader, JWT authentication, and request throttling to improve performance, scalability, and security
- Ensured application quality by writing unit and integration tests, maintaining code standards, and participating in code reviews and CI/CD processes
- Collaborated within an agile team to deliver features, participate in sprint planning and demos, and support continuous product improvements

(Next.js, React, TypeScript, NestJS, GraphQL, Apollo Client, MikroORM, PostgreSQL, AWS Lambda, Cognito, GetStream.io, S3, SQS, Tailwind CSS, React Hook Form, Zod, Jest, Playwright, Biome)
